A taxonomical study on the genus *Dryopteris* subgenus *Erythrovoriae* from China

Lu Shugang

(Institute of Ecology and Geobotany, Yunnan University, Kunming 650091)

Abstract In this paper, a taxonomical revision on the genus *Dryopteris* subgen. *Erythrovoriae* (H. Ito) Fraser-Jenkins from China is made. A new, revised system is proposed. 34 species and 2 varieties are recognized and placed in 3 sections and 2 series. Of which, section *Indusatae* S. G. Lu and series *Championianae* Ching ex S. G. Lu are described as new. A key to the sections, series and species is given. Each is provided with literature citations, synonymies and distributions.

Key words *Dryopteris* subgen. *Erythrovoriae*; taxonomical revision; China

鳞毛蕨属

Dryopteris Adans.

泡鳞亚属

Subgenus *Erythrovoriae* (H. Ito) Fraser-Jenkins in Bull. Br. Mus. Nat. Hist. Bot. 14 (3): 195. 1986.

Type: *Dryopteris erythrosora* (D. Eaton) Kuntze.

This subgenus more or less covered with bullate scales on the underside of costae and costules, or at least lanceolate scales with saccate base. It contains about 45 species, distributed mainly in Asia. China and Japan is its centre of distribution, a few species extending to New Guinea, Indo-China and E. Himalays. 34 species and 2 varieties are recognized in China.

Key to sections, series and species

1. Lamina lanceolate or ovate-lanceolate, usually pinnate to bipinnate; lowest basiscopic pinnule on the lowest pinna not markedly longer than those above; pinnule apex rounded, not caudate.
2. Upper parts of stipes bearing many small scales; scales on the base of stipes lanceolate, brown or light brown (Sect. 1. *Erythrovoriae* H. Ito).

3. Scales on the rachis sparsely, linear-lanceolate, thick, entire (Ser. 1. **Erythrovariae**).
 4. Lamina pinnate, pinna serrate or pinnatifid at margin.
 5. Lamina pinnate, pinna serrate at margin, shallowly cordate at base
 1. **D. decipiens** (Hook.) O. Kuntze
 5. Lamina pinnate, pinna pinnatifid at margin, cordate at base
 2. **D. decipiens** var. **diplozoides** (Christ) Ching
 4. Lamina bipinnate, pinnule with stalks at base.
 6. Pinnule triangular-ovate, serrate or pinnatifida at margin, obtuse at apex.
 7. Pinnule serrate at margin; sori near to costa 3. **D. fuscipes** C. Chr.
 7. Pinnule pinnatifida at margin; sori close to margin 4. **D. ryo-itoana** Kurata
 6. Pinnule lanceolate, pinnately lobed or pinnately parted at margin, acuminate at apex.
 8. Pinnule pinnately lobed; bullate scales densely on the costa and rachis; indusia reddish-brown
on the centre 5. **D. erythrosora** (Eaton) O. Kuntze
 8. Pinnule pinnately parted; bullate scales sparsely on the costa and rachis; indusia light reddish
on the centre 6. **D. hondoensis** Koidz.
 3. Scales on the rachis densely, ovate-lanceolate or linear-lanceolate scales exist simultaneously,
thin, toothed or entire (Ser. 2. **Championianae** Ching ex S. G. Lu).
 9. Scales on the rachis ovate, toothed at margin.
 10. Lamina bipinnate, pinnule entire or serrate at margin; scales on the rachis dark brown
 7. **D. lepidorachis** C. Chr.
 10. Lamina tripinnate or bipinnate, pinnules lobed; scales on the rachis brown
 8. **D. tsoongii** Ching
 9. Scales on the rachis lanceolate or linear-lanceolate, entire or toothed at margin.
 11. Upper parts of stipes and rachis bearing only scattered scales 9. **D. kinkiensis** Koidz.
 11. Upper parts of stipes and rachis densely covered with scales.
 12. Pinnae sessile, hardly adnate at base; scales on the rachis usually entire.
 13. Lamina tripinnate or bipinnate, pinnules pinnatifid 10. **D. simasakii** (H. Ito) Kurata
 13. Lamina bipinnate, pinnules pinnately lobed; scales much more densely
 11. **D. simasakii** var. **paleacea** (H. Ito) Kurata
 12. Pinnae with distinct stalks; scales on the rachis toothed at margin
 12. **D. championii** (Benth.) C. Chr.
 2. Upper parts of stipes glabrous; scales on the base of stipes linear-lanceolate, black or blackish-brown (Sect. 2. **Indusiatae** S. G. Lu).
 14. Sori exindusiate; pinnae opposite, hardly sessile; lowest basiscopic pinnule on the lowest pinna
not shortened 13. **D. gymnosora** (Makino) C. Chr.
 14. Sori indusiate.
 15. Pinnae sessile or subsessile; lateral pinnae horizontally patent from rachis.
 16. Basal pinnule on lower pinnae shortened and parallel to the rachis, overlapping the rachis
 14. **D. indusiata** (Makino) Yamamoto

16. Basal pinnule on lower pinnae not shortened and not parallel to the rachis.
17. Lamina bipinnate; serrates with long aristate on top; stipes usually purpure 15. *D. tenuicula* Matthew et Christ
17. Lamina tripinnate; pinnules pinnatisect, serrates without long aristate on top; stipes stramineous 16. *D. submarginata* RosensL
15. Pinnae with distinct stalks; lower lateral pinnae ascending, not at right angles to rachis.
18. Pinnae pinnatisect, pinnules adnate to pinna rachis 17. *D. guangxiensis* S. G. Lu
18. Pinnules with stalks or subsessile, not adnate to pinna rachis.
19. Pinnules oblong, rounded at base, rounded or truncate at apex, usually entire at margin.
20. Scales on stipe and rachis black; pinnules rounded at apex with spiny serrate; sori near to costa 18. *D. tenuipes* (Rosenst.) Serizawa
20. Scales on upper parts of stipes and rachis brown, pinnules rounded or truncate at apex, without spiny serrate; sori medial.
21. Lamina broadly deltoid, basal pinnae much more longer than those above; pinnules usually rounded at apex 19. *D. subtriangularis* (Hope) C. Chr.
21. Lamina ovate-lanceolate; pinnules usually truncate at apex 20. *D. assamensis* (Hope) C. Chr. et Ching
19. Pinnules deltoid-ovate, broadest at base, acuminate or obtuse at apex, pinnatilobate to pinnatisect at margin.
22. Pinnules cordate at base with 2~3 mm long stalks.
23. Scales on rachis and pinna rachis black; sori slightly near to margin 21. *D. integriloba* C. Chr.
23. Scales on rachis and pinna rachis brown; sori slightly near to costa 22. *D. tahmingensis* Ching
22. Pinnules rounded or cuneate at base, sessile or subsessile.
24. Scales on base of stipes black; lowest posterior pinnules on the lowest pinnae much longer than those above, pinnatipartite to pinnatisect 23. *D. labordei* (Christ) C. Chr.
24. Scales on base of stipes dark brown; lowest posterior pinnules on the lowest pinnae slightly longer than those above, pinnatilobate to pinnatifid 24. *D. pseudosparsa* Ching
1. Lamina pentagonal-ovate, usually tripinnate; lowest basiscopic pinnule on the lowest pinna markedly longer than those above; pinnule apex caudate and acutely pointed (Sect. 3. *Variae* Fraser-Jenkins).
25. Basal pinnae with 3~4 cm long stalks.
26. Sori indusiate.
27. Scales on stipe, rachis and pinna rachis black; indusia entire at margin 25. *D. sordidipes* Tagawa
27. Scales on stipe, rachis and pinna rachis brown; indusia with ciliate at margin

- 26. *D. xungwuensis* Shing et J. F. Cheng
26. Sori exindusiate 27. *D. dehuaensis* Ching et Shing
25. Basal pinnae with about 1 cm long stalks.
28. Lamina pentagonal, as long as broad, tripinnate, ultimate pinnules pinnatipartite.
29. Scales on stipes light brown; pinnae and pinnules with distinct stalks
- 28. *D. amurensis* Christ
29. Scales on stipes black; pinnae and pinnules subsessile 29. *D. formosana* (Christ) C. Chr.
28. Lamina deltoid-oblong or ovate, much longer than broad, bipinnate or tripinnate, ultimate pinnules entire or pinnatifid.
30. Ultimate pinnules or segments ovate; stipes densely clothed with brown, linear lanceolate scales at base 30. *D. yongdeensis* W. M. Chu ex S. G. Lu
30. Ultimate pinnules or segments lanceolate; stipes densely covered with black, dark brown or bicolor scales at base.
31. Scales on the top of rhizome and on the base of stipes completely black
- 31. *D. pacifica* (Nakai) Tagawa
31. Scales on the top of rhizome and on the base of stipes dark brown or bicolor.
32. Scales on stipes brown, hair-like at apex.
33. Lamina bipinnate, caudate-acuminate at apex; sori larger, usually in one row on either side of pinna rachis
- 32. *D. immixta* Ching
33. Lamina bipinnate to tripinnate, acute at apex; sori smaller, scattered on either side of pinna rachis
- 33. *D. varia* (L.) O. Kuntze
32. Scales on stipes bicolor, black on centre, brown towards margins.
34. Scales on stipes and rachis deflexed
- 34. *D. saxifraga* H. Ito
34. Scales on stipes and rachis not deflexed.
35. Rachis and pinna rachis densely covered with bullate scales
- 35. *D. setosa* (Thunb.) Akasawa
35. Rachis and pinna rachis sparsely clothed with bullate scales
- 36. *D. sacrosancta* Koidz.
